

Strategic Water Management

NSW Water Solutions

Background

Local government councils and water utilities manage large asset portfolios to deliver essential water supply, sewerage and stormwater services to the community.

Growth and higher community expectations place increasing demands on existing systems. Any large investment in new assets can have a big impact on annual rates and charges.

Our Services

Strategic Water Management (SWM) has a decade of experience and resident expertise to help councils and local water utilities excel in asset management.

SWM expertise offers solutions that help to satisfy the best practise guidelines and performance criteria of the Department of Water and Energy, the Department of Local Government and other agencies.

Strategic Planning Services

- Strategic Business Plan (including best practise audit)
- Long-term Financial Plans
- Revenue and Pricing Plans
- Developer Contribution Plans
- Integrated Service Strategies

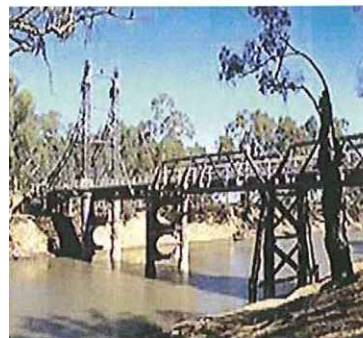

Asset Management Services
