

Report: CATALOG

This report lists the tables in the Total Asset Management System Databases, and their structures.

Tables are grouped within "System Modules" depending on their primary purposes. Refer to the System Report for a summary of these database groupings.

Within a group, tables are listed in alphabetical order. Several tables may constitute a logical set describing related entities. Refer to the data model diagrams for a quick navigation to which tables are related in this way.

System Module

TAMSApp

System Module Title

Total Asset Management

System Description:

This system was developed by the NSW Department of Commerce.

Long Table Name: AssetObjects

Short Name: ASSTOBS

To Be Extracted?: Yes

Using QBE?: No

Description: Asset Objects

Related Table	Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
	ObjectName	*	A	40		Object Name		*!

Description : Master List Of Tables - This Table

Related Table	Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
:Catalogue:Client.db :Catalogue:TABSTRUC.db	Table Name	*	A	50	R	Physical Name Of RDBMS Table			
	System	*	A	8	R	Name Of System Module		TBA	
	AutoID		+	1		Unique ID, Generated Automatically			
	Client Code		A	10		Code For Client For Whom Item Applies			:Catalogue:Client.db
	Table Type		A	3		Type Of RDBMS Table (Eg .DB Or .DBF Or .SQL)		{DB,DBF,SQL}	
	Long Table Name		A	50		Table Name Allowable Under Windows 95 / NT			
	Short Cased Name		A	50		Name Of Table Including Upper &			
	Lowercase Table Name		A	50		Lower Case Version Of Table Name Allowable Under Windows 95 / NT			
	Uppercase Table Name		A	50		Uppercase Version Of RDBMS Table Name			
	External Analogue		A	50		External Similar / Analogous / Source		NONE *[*?][*]	
	Description		A	100	R	Description Of Item		TBA *[*?][*]	
	Usage Notes		M	100		Notes Regarding Use Of Item			
	Current Number Records		I	1		Current Number Of Records / Rows In This File / Table			
	Security Checked		L	1		Status Of Table Regarding Checking Of		True	
	Obsolete		L	1		Flag Y / True Or N / False Used In Culling Obsolete Data			

Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
Export Order		S	1		Sequence For Exporting This Table			
Import Order		S	1		Numerical Order For Processing This			
InTAMSTableLoc		L	1	R	TBA		True	
FoundInMIMSDict		L	1	R	Located In The MIMS Data Dictionary		True	
CoolWorkFlag		L	1		Indicator Whether Table Is Sourced From Cool: Biz			
TransferFlag		L	1	R	Indicator Whether Table Should Be		True	
ReportFlag		L	1	R	Flag For Selecting Reportable Entries - Y(Es) Or N(O) For Record To Be Reported		True	
WorkFlag		L	1		Flag Used In Processing			
ReleaseFlag		L	1	R	Flag Indicating Whether This Item Has Been Released For Production Use. Refer To Document Control Procedures		True	
XtractFlag		L	1	R	Flag Indicating Whether A Table Should Be Exported Into MS Access		True	
XtractQBFlag		L	1	R	Flag Indicating Whether A QBE		True	
Destination DBName		A	32	R	Destination Database For Export Of IBIS Data		:IBIS:	
SkipScan		L	1		Flag Indicating Whether A Database Or Table Should Be Scanned (For Its Structure) Or Not			
CullFlag		L	1	R	Flag Controlling Data Culling Process		True	

Usage Notes : TableDes contains information about the various tables of the database.

It is used in conjunction with TABCOLUMN, TABLEDET and TABSTRUC for on-line documentation of the system.

Refer to the Operations Manual for further information.

Current Number Records: 698

Long Table Name: TableDetails

Short Name: TABLEDET

To Be Extracted ?:Yes

Using QBE ?: No

Description : [Detail List Of Detail Tables](#)

Related Table	Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
	Table Name	*	A	50	R	Physical Name Of RDBMS Table			
	System	*	A	8	R	Name Of System Module			
	Related Table	*	A	255	R	Name Of Related Parent / Master Or Lookup Table			
	AutoID		I	1	R	Unique ID, Generated Automatically		1	
	WorkFlag		L	1		Flag Used In Processing			
	SkipScan		L	1		Flag Indicating Whether A Database Or Table Should Be Scanned (For Its Structure) Or Not			

Usage Notes : TableDet contains information about the relationships between the tables of the database.

It is used in conjunction with TABLEDES, TABCOLUMN and TABSTRUC for on-line documentation of the system.

Refer to the Operations Manual for further information.

Current Number Records: 530

Long Table Name: TableStructures

Short Name: TABSTRUC

To Be Extracted ?:Yes

Using QBE ?: No

Description : [Structures Of Permanent Tables](#)

Related Table	Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
:Catalogue:SYSNAME.db :Catalogue:TABLEDES.db	Table Name	*	A	50	R	Physical Name Of RDBMS Table			:Catalogue:TABLEDES.db

Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
System	*	A	8	R	Name Of System Module			:Catalogue:SYSNAME.db
_Invariant Field ID	*	S	1	R	Number Of Field In Table - Maintained			
Column Name	*	A	25	R	Name Of RDBMS Column			
Standard Column Name		A	25	R	Corporate Standard Column Name (Preferred Alternative To Physical Column Name)		Corporate Standard	
Key		A	1		Key Of The File Or Table			
Type		A	1		NA - Awaiting External Documentation			
Size		S	1		Size Of Application System (Say In Function Points And Gbytes)			
DataTypeSize		A	15		Data Type And Size Combination (Eg Char(4))			
Column Description		A	150		Description Of RDBMS Column			
OK		L	1		Indicator Whether Item Has Been Checked For Validity			
_Required Value		A	1		Required Value? - Asterisk Means Yes			
_Min Value		A	255		Minimum Value Of Data Entry			
_Max Value		A	255		Maximum Value Of Data Entry			
_Default Value		A	255		Default Value Of Data Entry			
_Picture Value		A	175		Picture / Mask Of Data - Refer To Paradox Documentation			
_Table Lookup		A	81		Name Of Table In Which Data Must Be Found For Entry To This Table			
_Table Lookup Type		A	1		Refer To Paradox Documentation			

Column Name	Key	Type	Size	Rq?	Column Description	Min Val Max Val	Default & Picture	Table Lookup
Obsolete		L	1		Flag Y / True Or N / False Used In		True	
SkipScan		L	1		Flag Indicating Whether A Database Or Table Should Be Scanned (For Its Structure) Or Not			

Usage Notes : TabStruc contains information about the structure (ie table column contents) of the various tables of the database.

It is used in conjunction with TABCOLUMN, TABLEDES and TABLEDET for on-line documentation of the system.

Refer to the Operations Manual.

Current Number Records: 6266
